

SAKET RANJAN

Tech Lead | Solution Architect — Java, Microservices & Payments Platforms

Pune, India · saket.ranjan2407@gmail.com · +91-9309177135 · linkedin.com/in/saket-ranjan-382a9244

11.5+ Years Experience · Microsoft Azure Certified (AZ-900, AZ-203)

PROFESSIONAL SUMMARY

Tech Lead with 11.5+ years architecting and delivering enterprise Java/Spring Boot payment platforms for AT&T, spanning **Fiserv Commerce Hub** and **CyberSource** integration, **tokenization**, and fraud/bad-debt systems. Led teams of up to **13 engineers** through monolith-to-microservices and on-prem-to-Azure migrations, applying Saga, Outbox, and Circuit Breaker patterns for transactional resilience. Early adopter of **GenAI / Agentic AI** in engineering workflows (GitHub MCP Server, Copilot), cutting scaffolding time ~40%.

CORE SKILLS

Languages & Frameworks: Java 8/11/17, Spring Boot, Spring Data JPA, Hibernate, Multithreading, Collections, Streams

Architecture & Design: Microservices, System Design, Domain-Driven Design, SOLID Principles, GoF Patterns, Event-Driven Architecture, API Design

Security: Spring Security, JWT, OAuth2 (payment-API authentication & authorization)

Payments & Fintech: Fiserv Commerce Hub, CyberSource, Tokenization, AutoPay, Fraud & Bad-Debt Systems

Cloud & DevOps: Microsoft Azure (App Services, AKS) — primary; working knowledge of AWS and Terraform; Docker, Kubernetes, GitHub Actions, Jenkins, CI/CD Pipeline Governance

Data & Messaging: Apache Kafka (Confluent), Redis, Oracle, PostgreSQL, SQL

Observability & Monitoring: Glowroot, Grafana, Kibana (production issue diagnosis & performance monitoring)

GenAI / Agentic AI: GitHub MCP Server, GitHub Copilot, Claude Code, Generative AI Workflow Integration

Leadership & Practice: Technical Leadership (teams up to 13), Code Reviews, Mentoring, Agile Scrum, Certified Scrum Practitioner

PROFESSIONAL EXPERIENCE

Tech Lead — Payment Platform Engineering

Accenture | AT&T Account | Pune, India Dec 2021 – Present

Fiserv Commerce Hub Migration (Spring Boot, Redis, Kafka, Microservices, GenAI/Agentic AI)

- Owned solution design and drove API contract sign-off directly with AT&T and Fiserv as sole Tech Lead, unblocking delivery for the full team.
- Designed and delivered the end-to-end Fiserv Commerce Hub integration — auth, settlement, reversal, refund — fully replacing legacy CyberSource flows for **56M+ transactions and \$13B+ processed monthly** with no processing downtime during cutover.
- Engineered a distributed microservice architecture (Saga, Circuit Breaker, Outbox patterns) for transactional consistency, achieving **99.99% transaction reliability**.
- Used Glowroot, Grafana, and Kibana for production issue diagnosis and performance monitoring across payment services.
- Pioneered GenAI/Agentic AI adoption via GitHub MCP Server integration — cutting code-scaffolding time ~40% and improving Copilot suggestion accuracy.
- Built and deployed AT&T's in-house AI models to encode payment-API business logic as context for the team's AI tooling.
- Set architectural standards and code-review practices for the team; drove CI/CD hygiene improvements that **cut deployment failures by 98%**.

CAPM-BSSE: PAM REST API & Azure Cloud Transformation (Java, Spring Boot, Spring Security, PostgreSQL, Azure, Kafka)

- Led a 7-engineer team as Tech Lead, owning architecture, delivery, and performance for the CAPM platform transformation end-to-end.
- Architected the SOAP → REST migration of 15+ payment APIs and EJB → Spring Boot re-platforming, removing monolithic coupling.

- Implemented Spring Security with JWT and OAuth2 to secure the newly exposed REST endpoints, replacing legacy SOAP-based authentication.
- Designed the Azure-native deployment topology (App Services, AKS, PostgreSQL) with full CI/CD via GitHub Actions.
- Cut release cycle time ~30% through CI/CD pipeline governance and automated deployment controls.

Software Development Team Lead

Amdocs | AT&T Account | Pune, India Feb 2016 – Dec 2021

Dashboard–CTP Scripting: Azure Cloud Enablement *(Java, Spring Boot, Microservices, Azure, Kafka)*

- Led a 13-engineer team through a full monolith-to-microservices migration for a platform used by thousands of AT&T call-center agents.
- Designed the decomposition strategy and migrated 8+ services to Azure App Services with zero-downtime cutovers.

Bad Debt & Fraud Reduction — Microservices Modernization *(Java, Spring Boot, Hibernate, Oracle, Docker, Kubernetes)*

- Architected and delivered 10 payment microservices for AutoPay enrollment, transaction processing, and fraud signaling, contributing to a **1% reduction in fraud/bad-debt incidents per 100K transactions processed**.
- Applied Domain-Driven Design and SOLID principles across all 10 services; established unit-test coverage targets and CI quality gates that became the team's standard for defect prevention.

Additional Amdocs Contributions (2016–2021): Built the CyberSource/Visa tokenization pipeline for end-of-day settlement using Kafka event streaming for real-time notifications; delivered ACH and cryptocurrency gateway integrations expanding AT&T's digital payment channels; migrated 300+ AIX batch jobs to Linux and converted core COBOL modules to Java 7 with full functional parity as part of a mainframe modernization initiative.

Software Developer

Datamatics Global Services Limited | India Feb 2015 – Jan 2016

Built foundational Java/J2EE and Oracle development skills across the full SDLC in an enterprise services environment.

CERTIFICATIONS

- **AZ-900: Microsoft Azure Fundamentals** — Microsoft Certified, Active
- **AZ-203: Microsoft Azure Developer Associate** — Microsoft Certified, Active
- **Certified Scrum Practitioner** — Scrum Alliance, 2014
- **Generative AI & Agentic AI (MCP Servers)** — Practical, GitHub MCP / Claude Code / Copilot, 2024–Present

EDUCATION

B.Tech, Computer Science & Engineering — SRM University, Chennai, 2012

Industrial Training, Java Enterprise — HCL CDC, 2010

ACHIEVEMENTS & RECOGNITION

- Value Award (Accenture) — outstanding performance and impact on AT&T delivery
- Spot Award ×2 (Accenture) — exceptional individual contributions on critical deliveries
- Hackathon First Prize (Amdocs) — internal hackathon, innovative technical solution
- Innovation Council member (Amdocs) — drove adoption of emerging technologies
- Tech Summit Speaker — presented technical papers at internal summits
- Ahead-of-Schedule Delivery recognition from senior management
- Mentored 10+ junior engineers and interns
- Consistently top-rated across annual appraisal cycles
